Raven's Gift

Paper Mobile

The masters for this project contain seven elements for a two-sided paper mobile, based on the characters from the Raven story. You have two options:

- 1) Use the B&W masters and color the figurines before cutting them out;
- 2) Use the already colored elements masters.

Mobile Parts

The image on the right suggest one arrangement of the mobile. However, you can use different arrangements. Each element has it's front and back.

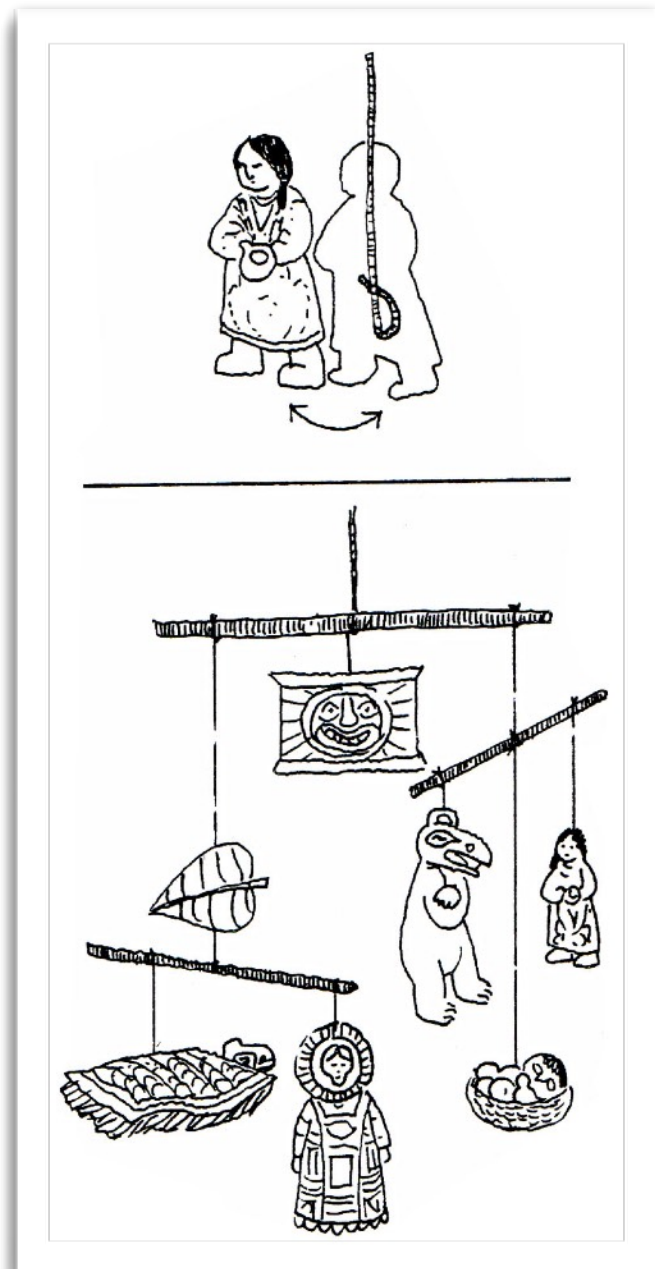

Coloring the B&W masters

- 1) On the computer
You can import the B&W masters into your favorite drawing program and color the cutouts there.
- 2) Manually
Print out the masters as B&W on a heavier paper. Color manually with pencils, watercolor, or crayons.

Assembly of the Elements

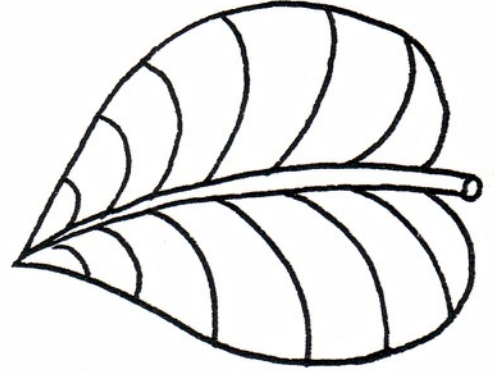

Once you have colored the elements, cut them out from the master pages. Cut tie-strings of sufficient length.

- a) Put some glue on the back sides of the elements, assembling one at a time.
- b) Place the string onto the first half and then glue the second half on.
- c) Tie the elements onto sticks, or onto other elements of the mobile.
